DETAILED ACTION

Response to Amendment

1. The amendment filed on 04/29/08 has been made of record and entered. Claim 6 has been amended. Claim 2 was previously canceled.

Claims 1 & 3-9 are currently pending in this application.

Status of Withdrawn Claim(s)

2. Claims 1, 3-5, & 9 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention(s), there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/09/07.

Claim Objections

3. Claims 6-8 are objected to because of the following informalities:

In line 1 of claim 6, claim 7, and claim 8, “production method for a purification catalyst” should be changed to recite --method for production of a purification catalyst--.

Appropriate correction is required.

Terminal Disclaimer

4. The terminal disclaimers filed on 04/29/08 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of ***11/032,233*** and ***US Pat. 7,199,079 B2*** have been reviewed and are accepted. The terminal disclaimers have been recorded.

Art Unit: 1793

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 6-8 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-2 of **U.S. Patent No. 7,259,127 B2**. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reasons.

Both the instant application and the Pat. '127 recite the same process steps of how to prepare the purification catalyst. Since the process steps are the same, it is only reasonable to conclude that it is inherent that the catalyst produced by the process of the Pat. '127 would have the same catalytic structure and formula as being required by the instant claim 6. Thus, there is no patentable distinction between the claimed method and that disclosed by the Pat. '127.

Claim Rejections - 35 USC § 112 (Second Paragraph)

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 6, the claim broadly recites “adding the at least one compound to an aqueous nitrate solution”, but it does not particularly point out what metal? or compound? of the “aqueous nitrate solution” being referred to in the claim. Thus, renders the claim vague and indefinite.

Response to Applicants' Arguments

7. Applicants' remarks filed on 04/29/08 have been fully considered, but not deemed persuasive in view of the new ground of rejection(s) and/or objection(s) above.

Citations

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. All references are cited for related art. See PTO-892 Form prepared.

Conclusion

9. Claims 1 & 3-9 are pending. Claims 6-8 are rejected. Claims 1, 3-5, & 9 remain withdrawn due to nonelected (distinct) invention(s). No claims are allowed.
